

## TERRA COTTA PATIO LIGHTS

Bring a warm glow to any outdoor living area with this unique lamp.

### What you'll need:

	<b>Dremel 200 Series</b>		<b>Silicon Carbide Grinding Stone 4,8mm</b>		<b>Spiral Cutting Bits Tile</b>
--	--------------------------	---	---	---	-------------------------------------

### Other Supplies:

- (1) 6" Terra cotta clay flower pot
- (1) 8" Terra cotta clay saucer
- (1) Tea light candle
- Dust mask
- Eye protection

## Step by step direction

---

### Step 1

Draw your own design or trace a pattern on the outside of a terra cotta flower pot. Note: The bottom of the pot is now the top.

### Step 2

Using the 562 tile cutting bit and a Dremel rotary tool, start the cut by grinding into the pot at a 45° angle, once you've cut through the wall of the pot, continue cutting by while keeping the bit 90° to the pot.

### Step 3

The 84922 Silicon carbide grinding stone can be used to smooth the edges of your cuts.

---

**Step 4**

Place a votive candle in the middle of the saucer and cover with the inverted terra cotta pot.
